MINISTER C.S. MACNAUGHTON
DEPUTY MINISTER H.I. MACDONALD
DIRECTOR G.K. BAIN

MINISTRY of TREASURY, ECONOMICS and INTERGOVERNMENTAL AFFAIRS

MUNICIPAL PLANNING & DEVELOPMENT BRANCH

INTRODUCTION

This publication is designed to provide, in a single volume, population data for Ontario municipalities for the period 1956 to 1971. It should be useful as a source of basic data on trends and change.

The major source of data is Statistics Canada, Census of Population for the years 1956 to 1971. For the years 1966 to 1971, the most recent data on assessed population compiled by the Assessment Division, Ministry of Revenue, is shown. The figures from both these sources are not strictly comparable and the reasons for this are noted in the reference notes.

Population figures are used in planning to indicate the size of a municipality and the trend in size. This information appears in Table A for each municipality.

The average annual rate of population change appears in Table B for various time periods between the census years 1956 and 1971. Using Table B, a comparison of rates can be made between time periods for a specific municipality or between municipalities.

Table C indicates the size of each municipality in relation to the regional municipality, district municipality, county or district in which it is located. Such a population comparison is one

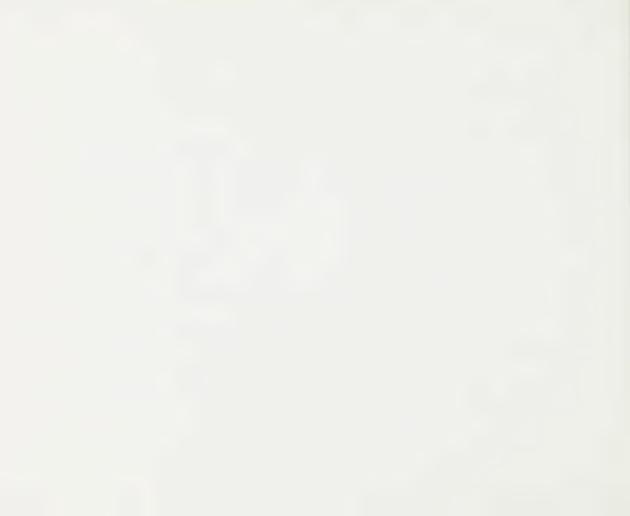

indicator of the relative prominence of the municipality.

The geographic area used for recording the population statistics is the area encompassed by the municipal boundary. Occassionally annexations and amalgamations change these boundaries. Where this has occurred, a symbol appears after the population figure, indicating the nature of the change. The symbols are explained in the reference notes.

Population data for a specific municipality can be located by referring to the regional municipality, district municipality, county or district in which the municipality is located. Here the municipalities are grouped by municipal status under cities, towns, villages, boroughs, and townships and arranged alphabetically.

The co-operation of Statistics Canada, the Regional Assessment Commissioners and the Computer Services Centre is acknowledged.

Ontario Population Statistics is prepared annually in the Planning Research Section, Municipal Planning & Development Branch, Urban & Regional Development Division.

REFERENCE NOTES

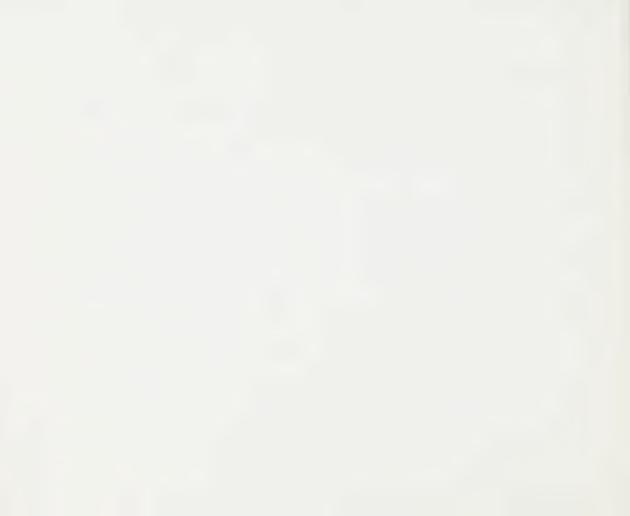

The population figures of Statistics Canada (S.C.) and the Ministry of Revenue (A.P.) are not strictly comparable. Normally, Statistics Canada figures will be greater as they indicate total population, in contrast with the assessed figures which have excluded persons in institutions and defence establishments. Comparisons of both figures are provided for 1966 and 1971.

Another factor affecting the figures is the enumeration time. The Statistics Canada figures are for a specific date, June 1st, but the enumeration of assessed population occurs over an extended period. As there may be considerable mobility during this period, it is difficult to avoid counting some people in two municipalities or even missing them entirely.

When there is a change in the status or name of a municipality, or in a municipal boundary, the nature of the change is indicated by one of the following letter symbols, shown after the population figure.

- A Amalgamation
- T Annexation to Annexation from
- S New municipality or change in status
- R Renaming
- G Several changes associated with regional government reorganization
- C Other or a combination of several
- Prior to incorporation or reduction

These explanatory notes will enable the reader to use the information with some knowledge of the constraints. Despite their limitations, these figures provide the most reliable and up-to-date population data for municipalities in Ontario.
